

Language Attitudes

Olena Shcherbakova

MPI-SHH
SUMMER SCHOOL
2021

Doorway
to Human History

Overview

Attitudes towards different languages

- Definition
- Complexity debate
- Case study: nominal and verbal complexity

Attitudes towards variation in languages

- Standard language
- Sources of variation
 - us vs them
 - spelling and punctuation
 - pronunciation
 - lexicon
 - grammar
 - me: now vs me: then
 - multiple ways of doing the right thing

Language attitudes towards different languages

SUMMER
SCHOOL
2021

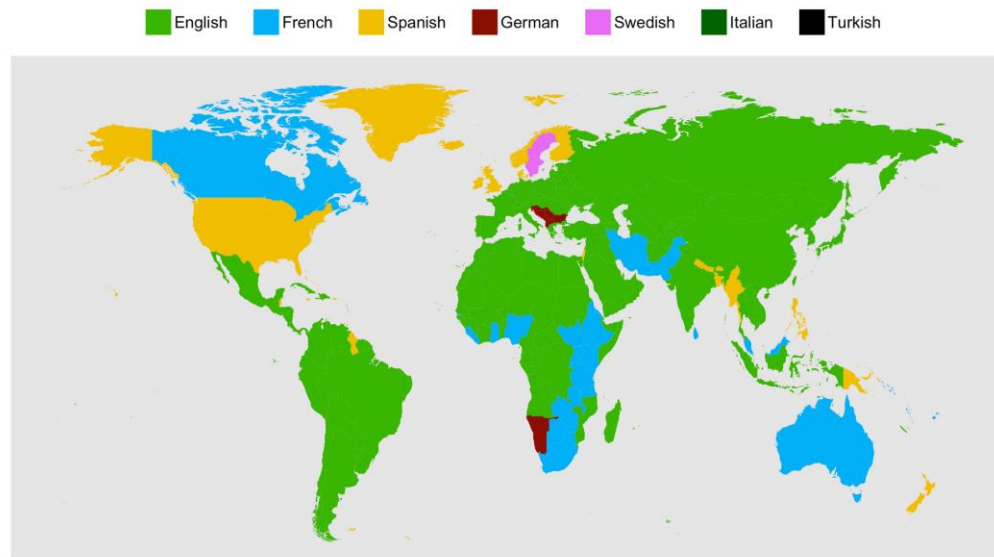

Doorway to
Human
History

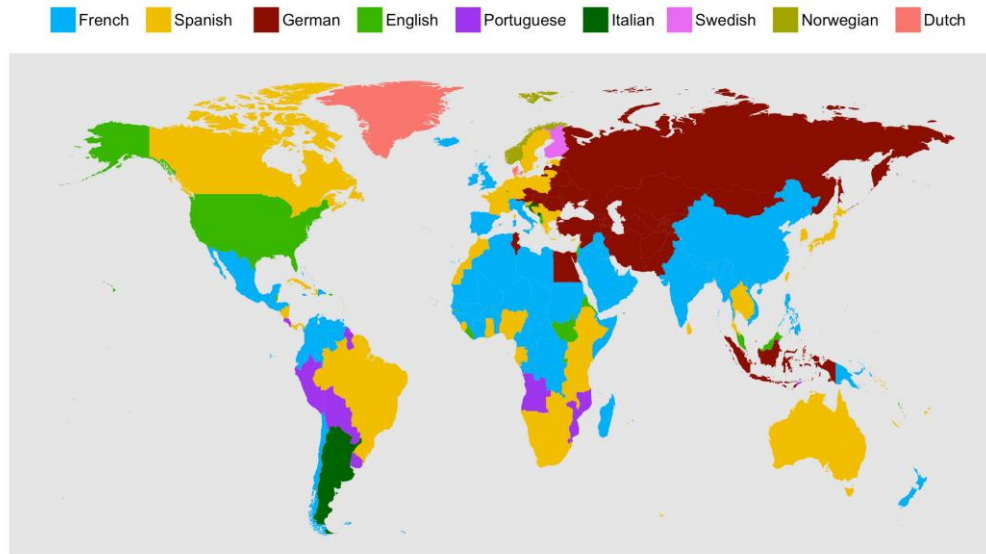

What are language attitudes?

The most popular language studied on Duolingo in each country

The second most popular language studied on Duolingo in each country

Story time

- “Young man, why would you want to learn Language X? It’s *the language of housewives*. Learn Language Y instead, *the language of the future*.”

Language attitudes

Language of the future?

Language of housewives?

Language attitudes

- “The study of what people think about different linguistic *varieties* and how those perceptions about language relate to perceptions of attitudes about different users of language” (Meyerhoff 2018: 63).
- *Variety = language/dialect*: “Relatively neutral term used to refer to languages and dialects. Avoids the problem of drawing a distinction between the two, and avoids negative attitudes often attached to the term dialect” (Meyerhoff 2018: 32).

Negative attitudes towards German dialects

- absurd gobbledygook
- funny dialect
- dreadful dialect
- passive-aggressive dialect
- almost normal German

Attitudes towards language users and their language

Attitudes towards language users and their language

- Housing discrimination: “landlords discriminate against prospective tenants on the basis of the sound of their voice during telephone conversations” (Purnell et al. 1999)

Language attitudes

Understanding human history and identifying processes that shaped linguistic diversity and languages used nowadays

Understanding how past events shaped our current attitudes towards:

- languages, dialects, and their speakers
- variation in language use

Complexity debate

SUMMER
SCHOOL
2021

Doorway to
Human
History

Stages of complexity debate

Time period	Prevailing idea
19 th century – first half of 20 th century	Languages differ in their complexity
Second half of 20 th century	All languages are equally complex
Two last decades	Languages differ in their complexity

Joseph & Newmeyer 2012

Stages of complexity debate

1) Languages differ in their complexity

- complexity = superiority
- “primitive” people speak “primitive languages”

Differences in complexity represent:

- different levels of civilization/cultural advancement (?)
- type of culture (emphasizing the concrete (Arabic and Semitic languages) vs the abstract (Greek); ideas (Chinese) vs human thought (Sanskrit and Greek))
- stages and direction of historical development: simplicity → complexity (Latin, Greek, and Sanskrit) or complexity → simplicity (Chinese)

Joseph & Newmeyer 2012

Stages of complexity debate

1) Languages differ in their complexity

Simple: clear transparent	Complex: elaborate consisting of multiple connected parts
Simple: primitive unsophisticated	Complex: obscure difficult

Stages of complexity debate

2) All languages are equally complex

- There are no “primitive” languages
 - Humanism: All humans are equal, and all languages are equal
 - Communication: the needs of speakers and hearers have to be met
- Complexity in one part of grammar is balanced out by simplicity in another (trade-off hypothesis)

Joseph & Newmeyer 2012

Stages of complexity debate

2) All languages are equally complex

In retrospect, this view:

- hindered the study of language complexity
- oversimplified the processes of language change (complexity had to be necessarily compensated for)

Joseph & Newmeyer 2012

Stages of complexity debate

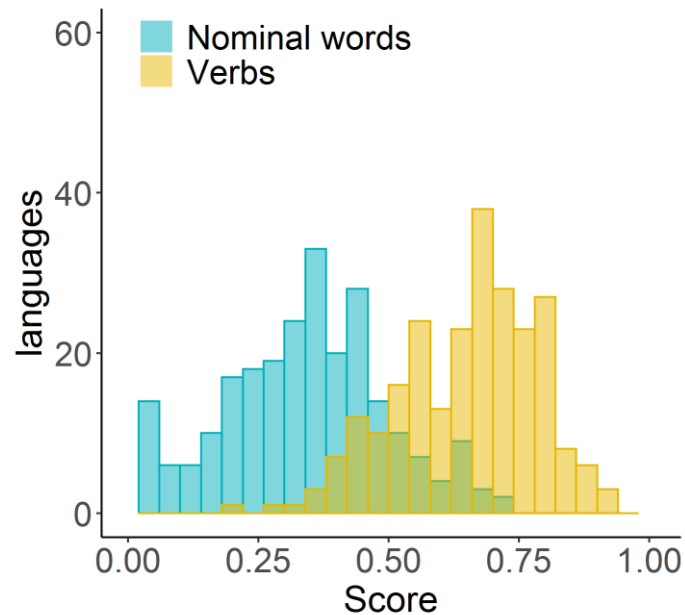

3) Languages do differ in their relative complexity

- detachment from “complexity = superiority”
- no language is “primitive”
- complexity in one part of grammar is not necessarily balanced out by simplicity in another, but the cases of compensation “trade-offs” have also been established, e.g. between case marking and word order (Sinnemäki 2020)
- a range of language-external factors has been proposed to influence grammatical complexity, such as population size (e.g. Trudgill 2011)

Joseph & Newmeyer 2012

Case study: nominal vs verbal complexity

Shcherbakova et al. (submitted)

Positive correlation ($r = 0.5$)

14 Sino-Tibetan languages
(Zhang et al. 2020)

Negative correlation ($r = -0.58$)

15 Indo-European languages
(Bouckaert et al. 2012)

Shcherbakova et al. (submitted)

Case study summary

- Languages do differ in their levels of complexity: levels of nominal and verbal complexity in different languages are not the same
- Patterns of change in complexity levels are family-dependent; no cross-linguistic tendencies have been established

Attitudes towards variation in languages

SUMMER
SCHOOL
2021

Doorway to
Human
History

Standard language

- “a set of norms that are shared across many localities and which have acquired their own social meaning”
- associated with education
- enjoys high social value

Meyerhoff 2018: 18

Standard language \neq best language

- there are no better or worse languages/dialects
- standard language has higher social value
- standard language represents the most appropriate option (“a safe bet”) in formal settings or where you are not sure that your interlocutor will understand you

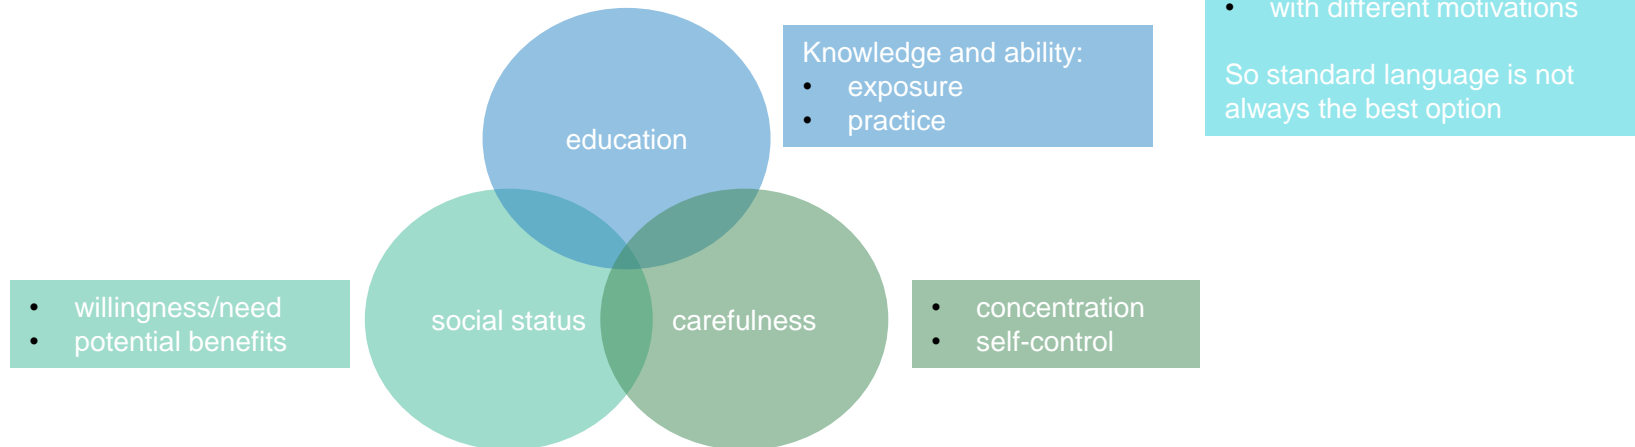

Standardisation

“The process of standardisation involves a community of speakers converging on a shared sense that some forms (spoken or written) are valued more than others and are therefore more appropriate in situations where people are speaking carefully and the exercise of social power is relevant – for example, in law courts, schools, funeral services, and so forth” (Meyerhoff 2018: 18).

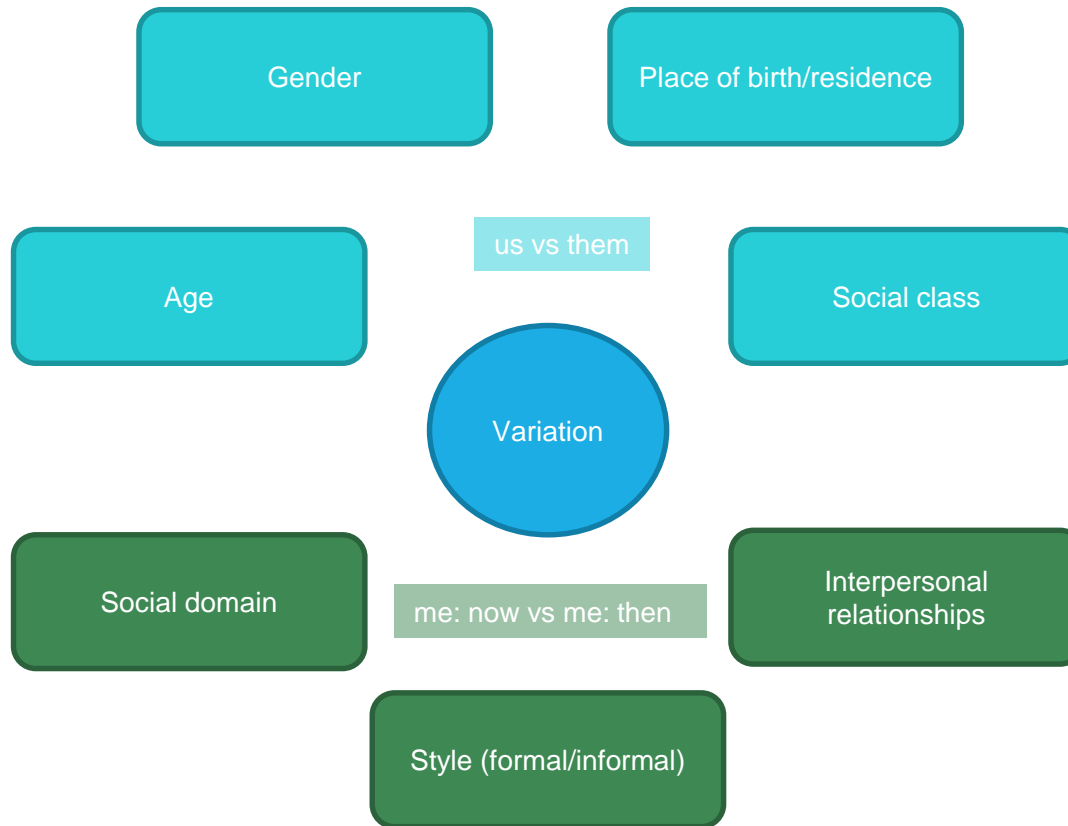

Standard language

Why don't people use standard language all the time?

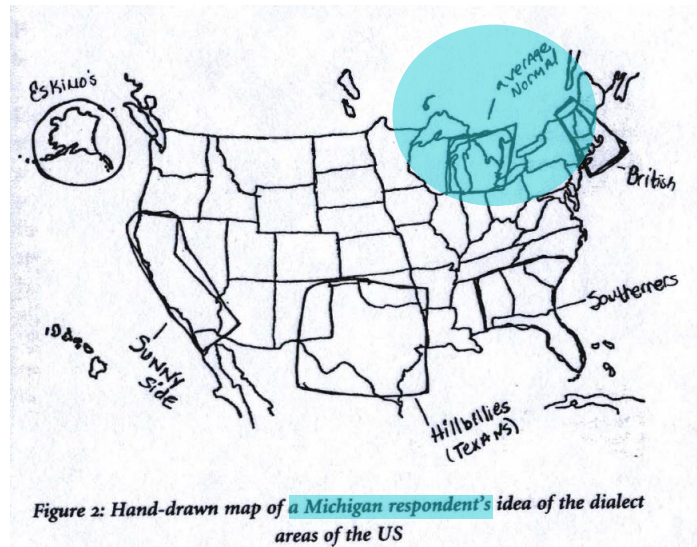

Meyerhoff 2018: 18

us vs them

- More favorable perception of in-group members than out-group members

Preston (1998: 143)

Linguistic insecurity

- speakers' feeling that the language they use is somehow inferior, ugly or bad
- negative attitudes to one's own variety

Meyerhoff 2018

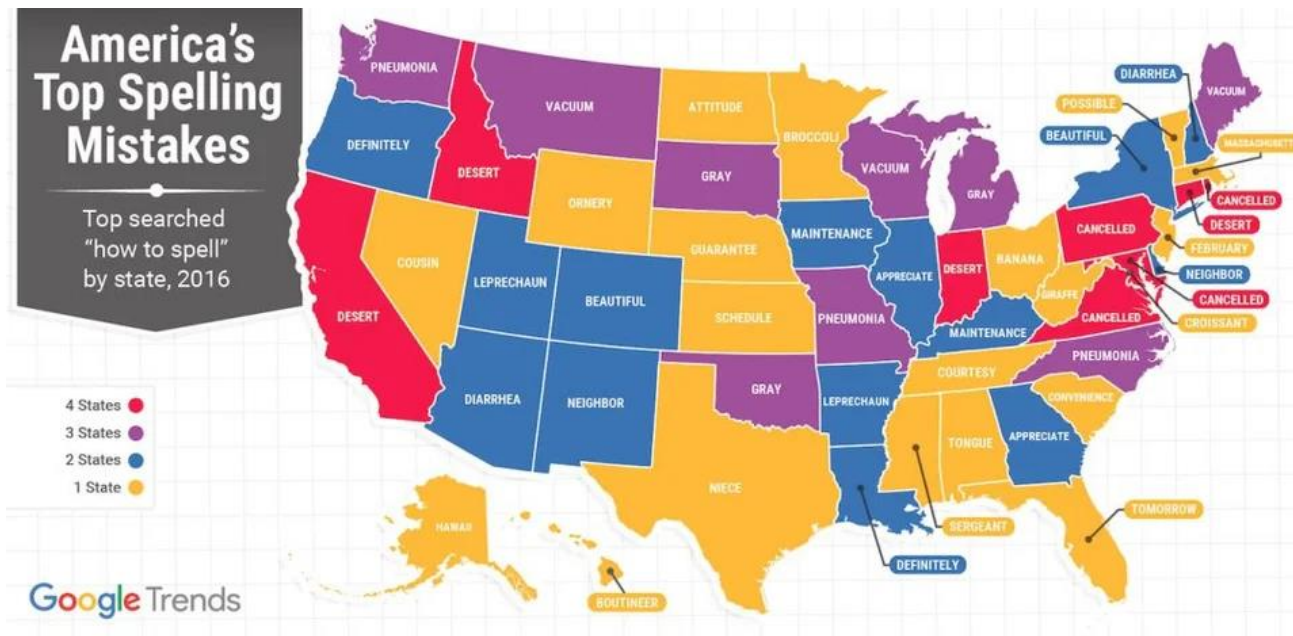

us vs them

- Spelling and punctuation
- Pronunciation
- Lexicon
- Grammar

Spelling

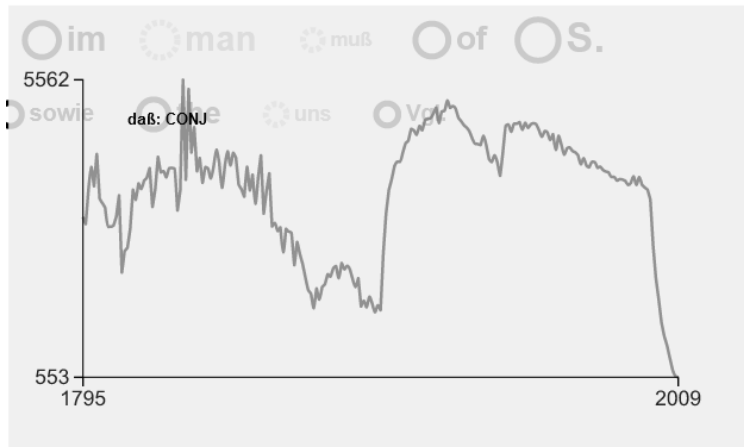

gray vs grey

us vs them:
place of birth or
residence

Spelling: Language reforms

The Oxford Comma Is Extremely Overrated

Gus Lubin Sep 21, 2013, 12:24 AM

	Oxford comma	No Oxford comma
Clear	We invited the strippers, JFK, and Stalin.	We invited the strippers, JFK and Stalin.
Ambiguous	We invited the stripper, JFK, and Stalin.	We invited the stripper, JFK and Stalin.

Pronunciation

The pronunciation of the letter "r" has more to do with your local accent than the language you're speaking.

[r/ɾ]

In Latin, "r" was rolled, and in these regions it still is. Many dialects roll the "r" once (called a flap) all the time, or when speaking quickly. However, in Spanish, the two sounds are thought of as distinct.

[R/ʁ]

In some dialects, the "r" is a more rough, guttural sound. This is most commonly heard in "high" French and German, but there are many French and German dialects that roll their r's, and many areas in other countries that now have a guttural "r".

[ɹ]

In most areas of England and Ireland, "r" is neither rolled nor flapped. In some of these areas (light green), the "r" sound is lost after a vowel, but in others (darker green) it is kept.

Grammar

Der?

Die?

Das?

us vs them:
following one of the
possible rules

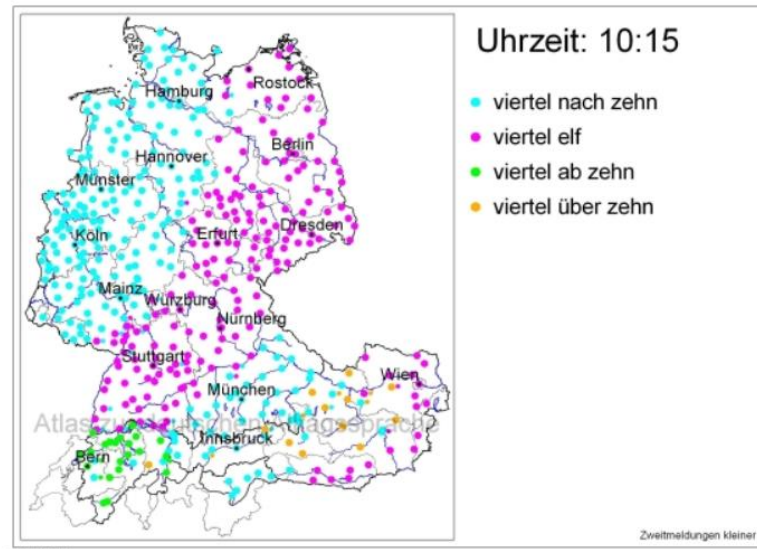

Grammar

„Ganz einfach: **DER** Brotaufstrich, **DIE** Nuss-Nougat-Creme und **DAS** leckerste Frühstück! **nutella** ist ein im Markenregister eingetragenes Fantasiewort. Entscheide also selbst, welchen Artikel du vor **nutella** setzt.“

Grammar

Uhrzeit: 10:15

us vs them:
place of birth or
residence

Grammar

Québécois French:

- the rise of one type of future tense (*je parlerai*) at the expense of another (*je vais parler*)
- some people belonging to higher social class and having higher levels of education go against the flow and keep using (*je vais parler*) more frequently (Wagner & Sankoff 2011)

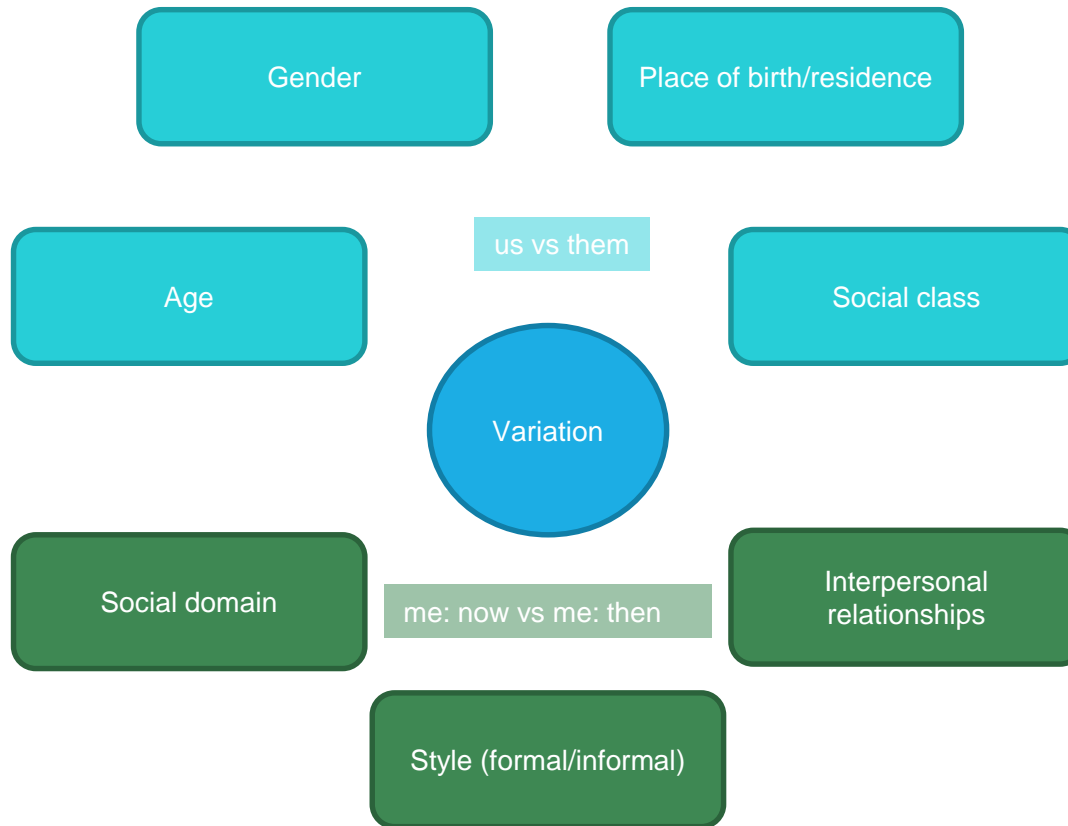

je	parlerai
tu	parleras
il/elle/on	parlera
nous	parlerons
vous	parlerez
ils/elles	parleront

je	vais parler
tu	vas parler
il/elle/on	va parler
nous	allons parler
vous	allez parler
ils/elles	vont parler

us vs them:

- education
- social status

me: now vs me: then

me: now vs me: then

- Exposure to different varieties
- Opportunities to practice using them
- Willingness/need to use them

Doing the right thing

“When I did the interview, I made sure to use a lot of words like ‘reprehensible’ and ‘dichotomy’. They perked right up.”

BBC Version

Dear Miss McGovern,
I am a trustee for Teesside Dementia Link Services, we are a small grass roots charity based in Stockton. Dementia is our passion, we want to help as many people as possible with the condition. The charity has been going for more than 4 years now and rose after a major funding loss left over 400 carers with out support. We really could do with a bit of a boost.

As a business and financial expert you will understand how the economy of Teesside has suffered over many years, as part of our mission to support carers and People with Dementia in our area, we also want to support local businesses too, almost every penny we raise is spent supporting our local economy, buying supplies and services as close to home as we can. We like many other areas suffer from larger corporate organisations talking money from our local economy and not offering much in the way support or services, and certainly not supporting our local economy.

You clearly are very busy, but if you can offer us any help we would be very grateful. The sort of think we were thinking was maybe support a fundraising event by encouraging people to donate, or be our president, many charities are helped by just being associated with a famous personality. The work would not be too onerous, or often. You can see the work we do from very limited resources here www.tdls2016.org and here www.facebook.com/tdls2016/. We do hope you have the time and are able to help.

Very best wishes
Mark Walker
Trustee

@StephLunch

...

Like all TV folk I get lots of charity requests — this one from [@LinkDementia](#) has made me+my mam laugh out loud (for the right reasons). Trustee Mark has sent two versions of an email asking me for help...one written as a 'BBC version' and then another 'Middlesbrough version' 🗣️

Middlesbrough version

Hia luv

Hope your ok pet, we need to borra ya for some stuff we would like ya tu elp us with, I am like a volunteer like for a charity like, that looks after old people yu know the ones that cant remember out, Mucky peg ad it, she was barred out the club cos she kept shout n house before the bingo even started. Our Mam said she was putn it on to get free drinks bu ya don't know do ya.

Any way like we saw that woman from larn of duty doin a thing about singin like, and weev got no one posh to tell gadgies about us like. So u sometimes talk posh so ja fancy given us a and like. We carnt pay ya as were basic like, but mad Reg is goin to spain soon so we might be able to ge ya sum duty free stuff like.

We are just fed up wiv gadgies cumin here and like saying elp these and elp these, then just bugger off to that London and just spend it on nowt.

If ya cumin up and want to stay ovea you can stay at our Karens, er blokes "Werkin away" at the minit, she mite ask ya to babysit but the babies great.

Anyway tarar for now let us know pet if you can giv us out

See ya
Fat Mark

Stockton on Tees

Doing the right thing

- highlighting similarities with groups of people we (would like to) belong to
- emphasizing differences with groups we are not involved with
- staying true to who we are

Language use

in different social contexts (social domain + interpersonal relationships):

- talking to colleagues
- talking to family and friends
- talking to people at different career levels you meet at conferences/workshops/summer schools
- talking to strangers at cafes and supermarkets

- How formal do I have to be?
- Can I use swear words or slang?
- Will this person understand my local dialect?

with different motivations (style):

- persuade
- inform
- impress
- provoke
- kill time

Take-home messages

- No language is better or worse
- Languages do differ in their complexity, but more complex does not mean superior or better
- People tend to have positive attitudes towards forms associated with standard languages, even though most people do not use them all the time
- Standard language is a dialect with high social value
- Doing the right thing communication-wise requires a lot of flexibility
